THE STATE OF MONTANA
DEPARTMENT OF STATE LANDS AND FARM LOANS
OFFICE OF REGISTER

Helena, Montana, December 1, 1920.

Hon. S. V. Stewart,
Governor of Montana.

Dear Sir:

In consequence of the duty imposed upon me by the provisions of Section 4, Chapter 147, of the 1909 Session Laws, I am transmitting herewith a set of tables succinctly exemplifying the transactions of the Department of State Lands and Farm Loans during the fiscal year 1920. You will find therein the amount of cash received from the various sources for the credit of each land grant fund; acres and value of lands sold, rentals received; additions during the year to the Common School grant through new surveys and lieu selections; also the amount of land remaining in each grant and its location by counties at the close of the year. Among the tables are some, not required by law, but containing information found to be of general interest, such as the amounts annually distributed from the Common School Income fund to the common schools of the state; the amount and sources of this and other income funds; the size of the several land grant permanent funds and how invested; and the cost of administering and caring for the granted lands and investing the permanent funds in Farm Loans under the present Farm Loan Act.

I have also made the usual annual estimate of the income to be derived from the operations of the Department for the fiscal year ahead (1921).

In amplification of the information contained in the tables submitted, permit me to make comment as follows:

Cash Receipts.

The falling off of half a million dollars from last year's total (\$1,770,070.57 as against \$2,263,728.95) is entirely due to following the very wise instructions of the State Land Board not to make any extensive offerings of State Lands for sale during this year of uncertainty as to the financial position of stockmen and farmer. All the income accounts show increases over last year totalling \$81,993.00, while receipts from land sales show a decrease of \$575,651.19, the net decrease as compared with 1919 being \$493,658.38.

Land Sales.

Aside from special sales asked for by applicants, only nine auction sales were held, out of the 28 which were due to be held in the counties this year. Sales totaled 24,270.70 acres as against 158,048.92 acres last year. The amount realized from acres sold was \$365,550.36 or an average of \$15.06 per acre. Last year's figures are \$2,484,753.44, or an average of \$15.72 per acre sold.

For the biennial period 1919-1920, the land sales total 182,319.62 acres for the sum of \$2,850,303.80, or an average of \$15.63 per acre. Refer to Table No. 14, for sales in previous years.

Town Lots.

In 1919 sales were made of 90 town lots for \$7,050.00, an average of \$78.33 per lot. 1920 sales were 37 lots for \$3,545.00, being an average of \$95.81 per lot. For the biennial period (1919-1920) the figures are 127 lots sold for \$10,595.00, or an average of \$83.43 per lot.

Timber Sales.

Prevailing high prices for timber stumpage have enabled the state to materially increase its income from timber sales, which this year amounted to \$102,218.24, as compared with \$63,882.54 received in 1919. For the biennial period the receipts from this source totalled \$166,100.78, all of which goes to swell the permanent land grant funds.

Leases.

Surface rentals of state lands have held up well considering the discouraging features developed in the agricultural and stockraising industries in the state. Rentals collected in 1919 amounted to \$456,188.59 on 3,228,308.52 acres, an average of 14.1 cents per acre; in 1920, \$460,679.29 was collected on 3,109,402.85 acres, or an average of 14.8 cents per acre, which is the highest average rental yet obtained. Part of this high average is due to the surface rental on oil and gas leases issued during the year. For the biennial period \$916,867.88 was collected from rentals alone, or about double the rental received in the biennial period just ten years previous (1909-1910).

1829 leases were issued in 1919 and 1598 in 1920.

There were 1,121,261.86 acres of state land vacant and not leased at the end of 1919. This number had increased to 1,303,528.74 acres at the close of 1920, due partly to prevailing poor agricultural conditions and partly to the large area of timber lands recently selected in Flathead county and not subject to lease under existing laws.

Coal Leases.

No material change in the number of these leases has been made and royalties run at the same low level, \$11,225.84 in 1919 and \$11,486.53 in 1920.

Oil and Gas Leases.

At the end of 1919 there were 153 of these in force, covering 109,197.95 acres and carrying a surface rental of \$15,243.20 per annum.

Due to recent discoveries of oil in Montana, quite a demand for these leases arose during the current year so that at the end of 1920, the total leases in force numbered 551, covering 300,406.75 acres and calling for an annual rental of \$55,901.00.

In the absence of any legislation relating specially thereto, and the lack of any exclusive renewal privilege under existing laws, these state oil and gas leases are generally considered to be of questionable value, and consequently little if any actual prospecting or drilling upon state lands has occurred. If any material income is to accrue from the state's oil and gas rights, legislation should be had which will assure to the successful driller the extension of his lease necessary to reap the benefits of the risk taken and money spent in prospecting. Up to date no income has been derived from oil royalties.

Land Grant Funds.

The permanent Land Grant Funds and how they are invested are shown in table No. 9 of this report. They now total \$21,245,094.05, or an increase of \$2,980,292.22 during the biennial period. These funds have been accumulated from sales of granted lands, sales of timber, royalties upon coal, stone, etc., and will hereafter be increased also by the addition of five per cent of all income and interest received in the Common School Grant.

Apportionment of Common School Income Fund.

Table No. 11 gives the annual distribution of the income from the common school grant and permanent fund, among the common schools of the state, for each year including 1920. The 1920 income will be distributed in February, 1921, and is expected to furnish a per capita distribution of \$6.00 for each child of school age in the state. This is the highest rate thus far paid and has been equalled only once before (in 1920 for the income of 1919).

Expenses.

Table No. 13 shows the expenses of the department for 1919 and Table No. 13-A the expenses for 1920, in each

case classified and distributed to the several bureaus of the department. The distribution shows the cost of the different activities of the Department as follows:

	1919	1920
Farm Loan Expense	\$ 20,228.65	\$28,846.67
Administration and care of lands	36,860.95	32,849.32
Care and sale of timber.....	59,052.36	33,903.32
	<hr/>	<hr/>
	\$116,141.96	\$95,599.31

Farm Loans.

At the close of the year 2131 farm loans were in force, amounting to \$4,264,470.00, of which number 580 were completed during the present year, amounting to \$1,056,600.00. There are 96 uncompleted mortgages of record for \$189,200.00 and 160 applications have been approved amounting to \$283,280.00, to be made when funds are available. In addition to above there are about 250 abstracts in the Attorney General's hands for approval of title, representing as many applications for about \$375,000.00, making the total amount of pending applications \$847,480.00. The funds available for investment now amounts to only \$112,230.06.

Respectfully submitted,

A handwritten signature in cursive script that reads "Sidney Miller". The signature is written in dark ink and is positioned above the title "Register of State Lands".
